

SimulTrain® Strategic Management Simulation

The new SimulTrain Strategic Management simulation workshop extends the application of the best-in-class project management, SimulTrain®, for supervisors through senior executives who need sharp strategic skills.

How It Works

Teams of four compete in leading a five-year project and determine how to best choose projects, prioritize them, react to risks and opportunities, and make decisions in a realistically serious game. With the facilitation of a professional trainer, the main objectives are to:

1. Obtain at least: Strategic Value of 80 points;
2. Complete the five-year program with a positive cash balance (at least 20 million);
3. Obtain an expected NPV of 50 million; and
4. Make the program profitable in 3 years.

Prerequisites

Participants will enjoy this experiential program most if they have some basic knowledge of:

- Project portfolio management
- Project financial indicators
 - NPV
 - Payback
 - Cash balance

Course Objectives

Participants will develop skills to help them:

- Understand the challenges of managing a portfolio of projects
- Recognize the scarcity/bottleneck of portfolio finances, resources, and time
- Balance/prioritize strategic value, NPV, cash balance, payback, and others
- Implement changes, and to react to risks and opportunities
- Become more effective team and organization leaders
- Make optimal decisions in a group, even in stressful situations
